Job Application for Information Technology Specialist (Multiple positions)

Dear Mr./Ms./ Recruiting Representative,

About Me

My name is Chris P. David and I believe that my experience in the realm of computers and my passion for Computer Science makes me an ideal candidate for any of these positions at the state. As a recent College graduate I have a very solid background in Computer Sciences. You state in the posting that you want someone who gets the job done while working with others towards a common goal, as well as someone who will bring not only a great work ethic but someone who others can work along with. Throughout my 5 years in college, not only did I work very hard for my Degree but I also worked two jobs, as an Student IT tech who took on responsibilities of a full time staff-member but also as an IT Specialist for a Not-for profit foundation in which I dealt with HIPAA compliance. Both of these jobs required me to be very specific to details while also paying attention to any issues that may arise at any time. In terms of pressure, my first job out of College I essentially adapted due to the transition of IT management and had to adapt in a matter of a month to provide support for a multitude of users at various locations. I manage not only 5 locations, but worked with an outside consultant team to address any issued that arrived in a timely manner.

Why Me?

As the 1st generation of my family to come to America and graduate with an Advanced Degree, I would say I worked hard all my life, in terms of learning various subjects but also becoming someone people can depend on. I love computers in general and as a kid I always wanted to get on my dad's computer, in which I learned how to get around his security password. From there I cultivated my desire to learn about computer science and it wasn't until my last years in my program in which I was able to get into a Cyber Security Internship where the spark of Computer Security was re-kindled and I started to learn as much as I could about it. Though I still consider myself a new person to this world, my hard work ethic and overall passion will make a strong and immediate impact at the state. I am excited about the opportunity to join the team. Thank you for your time and consideration.

Sincerely,

Chris P. David
